🏠 Melbourne, VIC | 📞 +61 466 129 232 | ✉️ ani.murasiya@gmail.com | [in linkedin.com/in/aniruddh-murasiya](https://www.linkedin.com/in/aniruddh-murasiya)

PROFESSIONAL SUMMARY

Electrical Engineer with hands-on exposure to control systems, commissioning support, electrical testing, site inspections, and technical documentation across operational and manufacturing environments. Experience supporting LV infrastructure checks, compliance activities, transformer testing, and LabVIEW-based monitoring and control applications, backed by postgraduate study in electrical engineering. Brings strong analytical capability in MATLAB/Simulink, PSSE, and system modelling, with a practical, safety-focused approach suited to SCADA/PLC environments, live operational sites, and multidisciplinary infrastructure teams.

TECHNICAL SKILLS

Control Systems & OT

- PLC Fundamentals | SCADA Fundamentals | HMI Basics | RTU Awareness | Industrial Control Systems | Instrumentation Basics | Control Logic Troubleshooting | Alarm & Monitoring Awareness | Functional Testing Support | Commissioning Support

Electrical Systems & Operations

- LV Systems Checks | Electrical Inspections | Testing & Verification | Isolation & Safety Awareness | Field Wiring Verification | Panel / Control Cabinet Familiarity | Switchboards Awareness | Motor & Pump System Awareness | Operational Site Support | Defect Identification

Testing, Commissioning & Documentation

- FAT / SAT Awareness | Site Testing Support | Inspection & Test Records | Technical Documentation | Compliance Documentation | Handover Support | As-Built Updates Awareness | Defect Tracking | Quality Checks | Reporting & Record Keeping

Software & Engineering Tools

- AutoCAD | MATLAB/Simulink | PSS®E | PSIM | LabVIEW | NI DAQ | Microsoft Excel | Microsoft Word | Microsoft PowerPoint | Microsoft Project

Power Systems

- Load Flow | Contingency | Voltage & Transient Stability | Dynamic Studies | EMT Concepts | HVDC | Renewable Energy | Transmission & Distribution (T&D) Networks | Power Quality Fundamentals | Fault Analysis

Professional Skills

- Stakeholder Coordination | Contractor Liaison | Technical Reporting | Problem Solving | Team Collaboration | Safety-Focused Work Practices | Time Management | Adaptability | Continuous Learning | Site-Based Communication

WORK EXPERIENCE

Junior Electrical Engineer | Laxmi Hi-Tech Transformers, India

Jan 2023 - May 2023

- Supported site inspections, compliance documentation, and testing activities for operational assets.
- Supported the testing department by recording test results, preparing reports, conducting final physical checks, and verifying transformers before dispatch, including testing support for units up to 1000 kVA.
- Assisted production and tanking activities over a 5-month period, coordinated with workshop staff, and prepared daily production and tanking reports to support quality and schedule control.
- Built practical understanding of transformer behaviour, manufacturing processes, quality checks, and documentation relevant to utility assets, including exposure to transformers up to 7 MVA.

Technical Marketing Executive | Falcon Global Sales Pvt. Ltd., India

May 2022 - Nov 2022

- Reviewed customer requirements for motors, pumps, and cables, and coordinated with vendors, dealers, and factory teams over a 6-month period to identify feasible technical solutions.
- Supported estimation, documentation, and stakeholder coordination while resolving specification and supply issues across customer-facing and manufacturing teams.

- Contributed to business growth by supporting customer enquiries and solution matching that helped drive 30% higher sales than the previous month for 3 consecutive months.

Engineering Intern | Synergy Transformer, India

Jan 2022 - Apr 2022

- Completed a 12-week hands-on internship in transformer manufacturing, testing, and assembly.
- Assisted with HV transformer assembly, terminations, wiring, and verification for units up to 15 MVA.
- Built a strong foundation in power transformers, safe work practices, teamwork, and quality-focused execution.

Grocery Team Lead | Woolworths Supermarkets, VIC | Part-time

Sept 2023 - Feb 2026

- Coordinated team operations, stock flow, and store presentation in a high-volume environment.
- Supported safe and efficient shifts by maintaining WHS standards and adapting to changing priorities.
- Strengthened leadership, communication, and problem-solving while helping the team meet daily targets.

PROJECTS & APPLIED EXPERIENCE

Infrastructure Control System Prototype | Academic Project, Swinburne University

- Designed and implemented a LabVIEW-based monitoring and control system using NI DAQ, with practical relevance to plant monitoring, instrumentation interfaces, and control logic validation.
- Developed signal handling, monitoring, and control functionality applicable to industrial automation and water/wastewater style operating environments.

Master Thesis - Comparative Analysis of ANN and PID Controllers for VSC-HVDC Networks | Research Project, Swinburne University

- Conducted steady-state and transient studies in MATLAB/Simulink and PSS(R)E to analyse system response under changing operating and fault conditions.
- Improved controller performance by achieving approximately 42% lower voltage overshoot and 35% faster settling time, demonstrating structured problem solving and evidence-based technical evaluation.
- Produced detailed technical reports and recommendations, strengthening capability in engineering documentation, analysis, and communicating technical findings.

Wave Energy Harvesting and Capacity Factor Optimisation | Individual Research, Swinburne University

- Evaluated renewable integration impacts, system performance, and stability considerations for grid-connected applications through simulation-based analysis.

EDUCATION/QUALIFICATIONS

Master of Engineering Science, Electrical

Jul 2023 - Jun 2025

Swinburne University of Technology, VIC

- Relevant study: power system operation, renewable energy, power electronics, large-scale power system analysis, engineering project management, research methods.
- Relevant control systems exposure through modelling, automation, and monitoring projects using MATLAB/Simulink, SCADA/PLC concepts, and LabVIEW-based NI DAQ applications.

Bachelor of Engineering, Electrical

Mar 2018 - Jul 2022

Gujarat Technological University, India

- Designed a cost-effective automation system using SCADA, PLC, and microcontroller programming; GPA: 8.84/10.

ADDITIONAL ACTIVITIES

- Full-time work rights in Australia (Temporary Graduate Visa).
- Melbourne-based and available to travel to operational sites.
- Victorian engineering registration and senior technical approval responsibilities not currently held
